Infiniband

On demand secure routing protocol resilient to byzantine failures

Adhoc Network Routing (Unmodified Simulation Models)

LDAP (load Balanced light weight directory accessed protocol)

Biometrics

Sensor Network: An Overview

Cellular Digital Packet data n/w

Cross layering in mobile adhoc network design

Group Communication in mobile adhoc network design

Predistribution Security

Computer clothing

Fuzzy Image processing

Uncheatable grid computing

Data Replication in data gred

Distributed Data based mang. System for data grid

Fault Injection for verifying testability at the VHDL level

EVDO - 3rd generation wireless high speed data

Light weight Efficient Application Protocol

Mobile Agent Middleware for Mobile computing

Designing ATM Internet Work

Wireless LAN (New Architecture)

Autonomic computing

Embedded linux

VANET (Vehicular Adhoc Network)

Window CE operating System

Kazaa Application service

RFID (Radio Frequency Identification)

Search Engine Technology

Intrusion prevention System

Jini (Network Technology)

JMX (Java Management Extension)

Automated worm fingerprinting

Flash Mob Computing

WLAN security

IRC (internet Relay Chat)

Wireless Networking

Computer forensics

Efficient memory mang. for message passing Concurrency

Flash Memory

Economic based resource scheduling for Grid Computing

Object Detection over videos

Holographic Memory

visual Techniques in animation

A Centralised load balancer

Multimedia Streaming Protocol

Packet Sniffer’s
